
Document: [S1] John was born in London. [S2] He studied at Oxford. [S3] London is in England.
Triple: (John, place_of_birth, London)
Positive Pair
Premise (evidence):
'[S1] "John was born in London"
Hypothesis:
'"John has place_of_birth with London"
Negative Pair (Distractor)
Premise (distractor):
'[S2] "He studied at Oxford"
Hypothesis:
'"John has place_of_birth with London"
NLI Model
(DeBERTa-v3)
$p^+ = 0.92$
$p^- = 0.31$
$\text{CED} = p^+ - \max(p^-) = 0.92 - 0.31 = 0.61$
