
(a) Individual Vulnerability Dominates
Judge 1
Judge 2
Compromised
Weakest link determines outcome
η_{max} dominates
K_{eff}
minor
$K = 3$
(b) η_{max} Diminishes with Panel Size
As K increases →
K_{eff}
(collective)
η_{max}
(individual)
K=3
K≥5
(c) Collective Diversity Absorbs Manipulation
Diverse judges
pairwise independence
K_{eff} dominates
η_{max}
minor
$K \geq 5$
η_{max} (weakest-link vulnerability)
K_{eff} (MI-based diversity score)
Relative predictive weight
